

TANTRA

For too long there has been a void in the world of professional Home Theater. The offerings available simply weren't good enough to perform to the exacting standards set by leading movie producers. These higher performance standards required a reinvention of the category of cinema loudspeaker.

Designed by the world's best engineers with direct input from over 200 top industry dealers, the all new Tantra line of ultra premium Home Theater architectural speakers has solved this problem and filled the void, forever. What makes Tantra so superior? High end European drivers, use of revolutionary Geocell (an injection molded volcanic ash and fiber cabinet providing greater rigidity and interior volume), and smaller in-wall footprints combine to create an astounding cinema experience.

Tantra - Pure Consciousness Through Pure Audio

Versatile Athleticism - *mounted or free standing*
